Eritrea – Illegal postage stamp issues

Dear Sir/Madam

The postal administration of **ERITREA** asks me to inform you of the following:

"The Eritrean postal administration has discovered that there are a considerable number of illegal postage stamps circulating on the philatelic market in the name of Eritrea. We are completely opposed to such an activity and find that this activity has ruined our reputation and good name, in particular given that some of the illegal stamps are quite obscene in nature.

"We are aware, through the Panafrican Postal Union, of the actions already taken to combat these activities and we are fully supportive of all actions taken by the PAFU and by the Universal Postal Union to deal with this serious problem. We feel that still more needs to be done and we are calling upon the UPU to do still more to clean up this market.

"We would therefore ask you to kindly inform all Union member countries and all our philatelic partners within the World Association for the Development of Philately that we strongly protest against the existence and continued proliferation of illegal postage stamps produced in the name of Eritrea. This is a phenomenon of which our postal administration has recently become a victim and which is of great concern to all Posts. We therefore wish to protest in the strongest terms against these illegal postage stamps.

"It is of great concern that the fraudulent postage stamps, inscribed "ERITREA" on its own or accompanied by the Eritrean and Arabic versions, should appear on various websites and in philatelic promotional publications. We have recorded no fewer than 600 illegal stamps!

"The deceitful advertising goes so far as to state that 'the origin of these stamps may be questionable and may be listed as illegals. We therefore suggest that you buy them only because you like them. We offer them because they are on the market.' As well as having face values in Nfa and a rather high selling price, some of these stamps are sold in perforated and imperforate formats. Worse still, the imperforate versions sell for double the price of perforate ones.

"The negative publicity these illegal postage stamps generate for our country amounts to a serious attack on the moral, religious and economic integrity of Eritrea and its postal service. It is a serious and flagrant violation of article 6 of the Universal Postal Convention and the associated provisions of the Letter Post Regulations. It is, in particular, a violation of the national legislation of Eritrea, and in

particular its law on the Post and its provisions on counterfeit postage stamps. Under the terms of this law, the Eritrean Postal Service alone is authorized to issue and disseminate postage stamps in the name of Eritrea.

"This situation is further aggravated by the fact that the logos of various organizations are reproduced on most of the illegal postage stamps.

"We call upon all parties to redouble their efforts to combat the scourge of illegal postage stamps and to exercise increased vigilance with regard to the production and distribution of such stamps in their respective countries. We are counting on the cooperation of all to help identify and track down the criminals responsible.

"The Eritrean postal administration thanks the Universal Postal Union and all Posts and philatelic partners for their support and calls upon all parties to send it any questionable material that they may find."

Yours faithfully,

M S RAMAN
Acting Director of Economic
and Regulatory Affairs
